normal temperature in cats ranges from 100.4° to 102.5° Fahrenheit. A fever in cats occurs when temperatures rise above 102.5° F.

Fever in Cats: Symptoms and Treatments

While cats make purr-fect pets for some people, they don't for others. Cats are dependent on their owners for all their needs — food, water, medical attention, exercise, shelter, and, most important, companionship. For many people, the years of unconditional love and devotion they receive from their furry “kids” far outweigh the daily responsibilities. But [...]
