Hence making this term clearer here is our discussion Motorcycle Engine Cooling System - Air Cooling VS Liquid Cooling VS Oil Cooling. Hence let's try to learn in detail. Motorcycle Engine Cooling System. You know a motorcycle engine burns the fuel in support of air and produces power to derive the motorcycle on the road.

### **Engine Cooling - Air Cooling VS Liquid Cooling VS Oil Cooling**

However, on scooters and other models where the engine is enclosed by the vehicle body, an engine-powered fan is sometimes used to send air to the fins in what is called "forced air cooling." Liquid-cooled engines use a water-based liquid to cool the engine, but they do not use any regular water, be it hard, soft or tap water.
