Thermodynamics I Question papers. About Thermodynamics : Thermodynamics is the branch of physics that has to do with heat and temperature and their relation to energy and work. The behavior of these quantities is governed by the four laws of thermodynamics, irrespective of the composition or specific properties of the material or system in question. The laws of thermodynamics are explained in terms of microscopic constituents by statistical mechanics.

Thermodynamics is the study of energy transformations. The chemical energy present in a molecule is released in various reactions. The chemical energy can be transformed into other forms of energy, e.g. to do mechanical work as burning of fuel in an engine, provide electrical energy as in dry cell, etc. Thermodynamics takes into account the initial and final state of a system and does not ...
