Air entering fuel system. Immobiliser fault. Faulty or incorrect ESOS (engine stop solenoid) or ELAP. Electronic engine control fault. Test ECU ...

Diesel Engine Faults Troubleshoot Chart

In automobiles, a start-stop system or stop-start system automatically shuts down and restarts the internal combustion engine to reduce the amount of time the engine spends idling, thereby reducing fuel consumption and emissions. This is most advantageous for vehicles which spend significant amounts of time waiting at traffic lights or frequently come to a stop in traffic jams.

Start-stop system - Wikipedia

If your check engine light comes on, it's best to take your vehicle to a mechanic to get it professionally diagnosed and repaired. X Research source Warning: Once the OBD system resets (which occurs after a few drive cycles or a certain number of miles, depending on the vehicle), the light will come back on if the problem has not been fixed.

How to Reset a Check Engine Light: 7 Steps (with Pictures)

Cummins Engine Fault Codes list | Truckmanualshub.com

Can't explain the beep, but there may not be a fault. If the service light (spanner) is on permanently it's an indication that there's less than 600 miles to the next service. Eco mode will come on if it's done a lot of startups without a decent run, to ensure that the battery has enough charge left to start the engine - my car hasn't got stop/start, but I'd assume it's disabled for the ...

Engine Fault Error, Eco Mode & Stop/Start not Working DS3 ...

I just bought a 1.6 dig-t 2016 a few days ago. Literally driven 150miles and I get this auto stop start fault and orange EML. Is this battery issue, o2 sensor or new engine? If new engine I'm going to reject the vehicle and get my money back..... Any advice welcomed, thanks in advance Bazz

Stop/Start Fault - Page 10 - Nissan Pulsar Forums

You stop at a red light. The engine automatically shuts down. The light goes green, you start lifting off the brake, and the engine kicks back into life, as if by magic. We're talking about that. Systems like Mazda's i-Stop - and seemingly 100 other proprietary names for similar bullshit technology.

The Truth About Automatic Engine Stop-start Systems — Auto ...

An engine can stall under different conditions, depending on the specific fault. For example, the engine may stall during acceleration, while idling, after reaching operating temperature, or stall intermittently. If you need more information or would like to conduct some tests at home, this other post on car stalling issues can help you.

Diagnosing Your Engine When There Are No Trouble Codes ...

What an engine warning light means. The engine management light (EML) to give it its proper name, doesn't indicate a specific fault. It could be alerting you to one or more issues, typically linked to exhaust emissions. Some are more serious than others. The light is connected to the car's main computer, called the engine control unit (ECU).

Engine management light: 10 reasons why check engine ...

These are Engine Start System Fault Indicator symbols. They can appear in yellow/amber or red and indicate a fault in the electronics. If it is red, it is suggested that the engine NOT be switched off, if its running, and a service center be contacted immediately. If it is amber, a service facility should still be contacted as soon as possible.

Engine Start System Fault Indicators: Key images ...

Have the fault code (s) read as they are normally stored after the light has been on, don't leave it as the issue may crop up again? Then go from there, could be as simple as a poor connection the stop start light is likely to be on because the engine light was on rather than causing the EML being on.

Technical: Engine management light and stop/start light ...

Mazda i-stop Green Light. Depending on the model and location of your Mazda, the green i-stop light illuminates either when the engine has been stopped and turns off when the engine is restarted, or illuminates when engine idling stop conditions are met while the vehicle is being driven.

Mazda i-stop Not Working - DASH-LIGHTS.COM

Re: stop/start system fault Post by Daewar » Sat Oct 08, 2016 5:52 pm If the system is serviceable, I cant see how depressing the clutch will set off the error, the clutch is designed to be depressed, or be in any position between its range of movement.
